Research Experience

KIXLAB, School of Computing, KAIST	Dec 2023 – Present
Student Researcher Advisors: Prof. Juho Kim, Prof. Dae Hyun Kim.	
– Multi-Agent Synthetic User Research (LG AX INSIGHT) Designed an agentic framework for conducting synthetic focus group studies. Built an experience augmentation pipeline to increase the diversity of synthetic user utterances.	
– Agentic Evaluation of Generative UIs (SAMSUNG DESIGN OFFICE) Developed an evaluation loop for generative UI models using a computer-use agent. Contributed to designing an LLM-as-Judge that evaluates generated UIs based on user queries.	

	– Personalized AI Application Planning System (ALGORITHM LABS) Developed an expert support system for AI application planning. Implemented a real-time reasoning graph with <i>Graphology</i> and conducted focus group evaluation [C2]. – Scalable Heuristic Evaluation with LLM (SAMSUNG CX INSIGHT) Investigated automating user experience evaluation workflows with LLMs. Trained a multi-head attention pooler with <i>DinoV2</i> backbone for intent-based design example search [D1]. – Semantic Legal Retrieval System (KOREA MINISTRY OF DEFENSE) Mentored military officers developing a legal retrieval system, contributing to a hierarchy-preserving document indexing pipeline using <i>FAISS</i>.	
	Lifestyle Media Group, Art & Technology, Sogang University	Jan 2022 – Apr 2024
	Student Researcher Advisor: Prof. Yongsoon Choi.	
	– Conversational Audio Guide for Museum Interviewed museum docents to identify pedagogical dialogue strategies. Designed a graph-based dialogue system with <i>Neo4j</i> and <i>NetworkX</i> for topic navigation and user modeling [P2].	
	Naver Labs, Naver Corporation	Jun – Dec 2023
	Research Engineer Intern Advisors: Prof. Giseop Kim, Dr. Sunwook Choi.	
	– Monitoring Interface for Autonomous Vehicle Developed a positional uncertainty monitoring interface for remote operators. Designed <i>Markov Chain</i> visualization on an interactive map using <i>ROS</i> and <i>WebGL</i> [P1].
